

Building and Construction Recovery

Ryan Fraud and Forensic Recovery, LLC helps our clients save and recover money by proving and pricing Building and Construction claims.

We can recapture overpayments, improper payments, excess costs and damages for recovery from responsible parties and proactively assert damages and/or defend in litigation, if necessary, with sufficient relevant, reasonable and reliable evidence and auditing with the right to inspect contract.

We help our clients in reviewing their contract right to audit provisions to assist in our analysis.

Benefits

- For Owners, we can help recover building related construction costs from contractors utilizing the "right to inspect or audit" the books and records.
- For Developers and Contractors, we also inspect and audit the books and records of subcontractors and their vendors and suppliers.
- We search for cost overcharges, duplicate payments, questionable costs, unsupported costs, among others.
- Our work can be accomplished during or after completion of the project-related contracts.
- Since contracts typically require the retention of job cost records for several years these recoveries can be done "after the fact".
- We can offer our services on a Performance Fee basis if that best suits the needs of our Client.

Ryan's Fraud and Forensic Recovery professionals conduct expert analysis using our proprietary Ryan eAnalytics™ software – the most advanced electronic data discovery and analysis tool in the industry today. Powerful and remarkably non-intrusive, Ryan eAnalytics™ is state-of-the-art technology that provides corporations the most thorough and accurate data mining and discovery analysis available anywhere.
